singpass

Your trusted digital identity

Hello there!

Singpass is your **trusted digital identity** to access government and private sector services online and in person. Check your CPF balance, book medical appointments, renew insurance and more.

Enjoy even more convenience with features like digital signing and quicker ways to prove who you are while keeping your personal information safe.

With Singpass, everyone can live confidently with easier, faster, and safer everyday transactions.

Enjoy more everyday ease with the Singpass app

Log in to services with your fingerprint, face or 6-digit passcode. No more entering passwords!

Prove who you are with your Digital IC* or scan the barcode at kiosks in libraries and polyclinics.

Scan QR codes to provide your personal information to trusted organisations without handing over hardcopy documents.

* Applicable at government agencies and organisations that accept the use of the Singpass Digital IC.

Tap into more daily convenience

View all your key information in the customisable profile section. Your information is encrypted and user authentication is required when you access your profile, all to keep your data safe.

Digitally sign documents and authorise transactions on the go, without having to be physically present to sign documents.

Receive timely notifications from government agencies in your inbox.

Get the Singpass app now

1. Download the Singpass app from the App Store, Google Play Store, or Huawei AppGallery. Check that the app developer is 'Government Technology Agency'.

2. Complete a quick one-time setup. If you have not set up your 2FA, select 'Face Verification' to verify your identity during app setup.

3. Start using the Singpass app now, for all your everyday transactions!

The digital identity that protects your information

To safeguard your account, Singpass requires you to complete a two-step authentication process whenever you access services.

Choose your preferred Two-Factor Authentication (2FA) method:

Use your fingerprint, face or passcode on the Singpass app.

Enter a One-Time Password (OTP) sent to your mobile number via SMS.

Scan your face for logins on desktop, mobile browsers and at agencies' kiosks enabled by Singpass Face Verification.
